

**THE SACCO SOCIETIES REGULATORY AUTHORITY  
(SASRA)**

**SASRA/Circular No. 9 of 2011**

**25th January, 2011**

All Chairmen,  
Deposit Taking Sacco Societies

Dear Sir/Madam,

**RE: INFORMATION ON YOUR CURRENT MIS SOFTWARE**

The SACCO Societies Regulatory Authority in partnership with sector stakeholders has embarked on a project to facilitate the improvement of Management Information Systems (MIS) used in deposit taking SACCOs.

The project is funded by the Financial Sector Deepening Trust (FSD) Kenya and entails training of SACCO staff both in ICT and related areas. The project will also assist the software vendors to establish a certification mechanism for the implementation of automation projects. The ultimate goal of the project is enhancing the operating and reporting capabilities of the systems thereby complying with the operational regulations and prudential standards as provided in the Sacco Societies (deposit taking Sacco business) Regulations, 2010.

In order to facilitate this process, SACCOs are requested to complete the attached questionnaire as straightforwardly as they can and to the best of their knowledge. The questionnaire should preferably be completed by the ICT staff.

The responses will be used to assess how adequate your MIS are in respect of compliance with the regulatory requirements, identify areas of improvement in MIS implementation projects, vendor support, identify training needs and objectively compare the different software in use in the Sacco subsector.

We look forward to your support and cooperation in this important initiative to improve the MIS in the Sacco subsector.

Yours sincerely,

**Carilus Ademba, HSC  
CHIEF EXECUTIVE OFFICER**

Encl.
